Mouse control works. However, specified keyboard control (WASD) is not possible. The arrow keys for character movement are recognized, but unfortunately the keys "E" (use) and "R" (reload) are not accessible. Probably the developer brought some more bugs into the game with his last update. Game is returned! Maussteuerung funktioniert. Angegebene Tastatursteuerung (WASD) ist jedoch nicht möglich. Zwar werden die Pfeiltasten zur Charakterbewegung erkannt, aber leider sind dadurch die Tasten "E" (benutzen) und "R" (Nachladen) nicht erreichbar. Wahrscheinlich hat der Entwickler mit seinem letztem Update einige weitere Bugs ins Spiel gebracht.. Mouse control works. However, specified keyboard control (WASD) is not possible.

Laser Maze Computer Patch : I've released a new patch for Laser Maze: The Computer Patch! -Fixed screen size glitch on some computers. (This caused the computers, menu, cursor, and some visual effects to be scaled incorrectly when used with some displays.) -Made it so tutorial text no longer says "computer". Whoops.. Change in Release Date : The release date for Laser Maze has changed, due to the Steam Winter sale. The Steam Winter sale will greatly reduce the launch publicity of Laser Maze, so it will be released after the sale. The sale ends on January 3rd, so the current release date for Laser Maze is January 4th. The release date is still subject to change.
